

## Munacryl MM-144

### Finishing

### Acrylic Emulsion Binders

#### Description

**Munacryl ME-105** is a medium soft acrylic emulsion binder which is used alone or in combination with other finishing agents to produce special effects. It gives brilliant finishes to aniline leathers. If **Munacryl ME-105** is thickened with ammonia, the viscosity will be increased moderately.

#### Specification

<b>Appearance</b>	Milky Liquid
<b>Nature</b>	Acrylic
<b>Ionity</b>	Nonionic
<b>Solid Content, %</b>	42 ± 1
<b>Safety</b>	According to the best of our experience, it does not have any harmful effect on health
<b>Packing</b>	100 KG PE Drums
<b>Shelf life</b>	1 year

#### Applications & Recommendations

**Munacryl ME-105** is a bottom coat binder for sealing the grains of leather with higher absorption. Because of its properties, **Munacryl ME-105** can be used single or in combination with other Munacryl groups to obtain leather with great gloss and high lightfastness.

#### Caution

**Munacryl ME-105** is cold-sensitive, so in storage and transportation must be kept

away from freezing.

#### Storage Conditions

The product should be well sealed and must be stored in covered area between 5-25°C. Freezing and direct sun light must be avoided.
