<b>Shelf life</b>	1 year

#### Applications & Recommendations

**Municide WB** is specially used in the main soaking, pickling, tanning and retanning process. Degreasing plays a very important role in the way of using this product.

It can be used also for raw materials by spraying or mixing with salts and

applying. Our recommendation for use is as below:

#### **Soaking:**

Up to 0.05% based on raw weight

#### **Pickling:**

0.5 - 1% based on pickled weight and before acids addition

#### **Tanning (Wet blue):**

1 - 1.5% based on pickled weight and at the end of chrome tanning

#### **CAUTION:**

Due to various methods of degreasing, processing and also the type of leather, our advice is without any guarantee. Please test with your own choice and formula and keep in certain condition and time duration for fine confirmation.

#### Storage Conditions

The product should be well sealed and must be stored in covered area between 5-25°C. Freezing and direct sun light must be avoided.
