**Munipal 151** is an anionic soaking and wetting agent which is employed in various stages of leather processes. It also makes great washing and degreasing impact on wool.

#### Specification

<b>Appearance</b>	Yellow liquid
<b>Nature</b>	Alkyl aryl sulfonate
<b>Activity, %</b>	45 ± 1
<b>pH (1:10 solution)</b>	7 ± 1
<b>Ionity</b>	Anionic
<b>Safety</b>	According to the best of our experience, it does not have any harmful effect on health
<b>Packing</b>	100 or 200 KG PE Drums
<b>Shelf life</b>	1 year

#### Applications & Recommendations

A small quantity of **Munipal 151** accelerates the soaking operation. **Munipal 151** is used in main degreasing stage, usually for less greasy skins or hides (e.g. goat, cow). In the case of hides (which mainly need vacuum drying), because of some slippery effect, it facilitates de-wrinkling.

Don't use **Munipal 151** with bating agents at the same time. The recommendation for use is:

#### Soaking:

Up to 0.5% based on raw weight

#### Wetting back (Retannage):

0.2 - 0.5% based on shaved weight

#### Storage Conditions

The product should be well sealed and must be stored in covered area between 5-25°C. Freezing and direct sun light must be avoided.
