Basicity, %	33 - 35
Ionity	Anionic (electrolyte stable)
Cr₂(SO₄)₃, %	25 ± 1
Safety	According to the best of our experience, it does not have any harmful effect on health
Packing	25 KG PE Bags
Shelf life	1 year

Applications & Recommendations

Munirom can be used in tanning and retanning of all leather types including hides or skins, due to its specific properties.

Apart from tanning effects, it imparts uniformity and evenness to the color of the leather. So, it could be used in dyeing process for any shades. Leathers made with this product have got fine grains with great compactness. **Munirom** is also compatible with other standard chemical products used together with this product.

Storage Conditions

The product should be well sealed and must be stored in covered area between 5-25°C. Freezing and direct sun light must be avoided.
