

## Munitan MAK

### Retanning

### Syntan & Auxiliary

#### Description

**Munitan MAK** is an anionic retanning and neutralizing syntan with good buffing and dyeing properties.

#### Specification

<b>Appearance</b>	White powder
<b>Nature</b>	Organic and inorganic compounds
<b>pH (1:10 solution)</b>	7.5 - 8
<b>Ionity</b>	Anionic
<b>Safety</b>	According to the best of our experience, it does not have any harmful effect on health
<b>Packing</b>	25 KG PE Bags
<b>Shelf life</b>	1 year

like caustic soda.

300%	Water	35°C
1%	Sodium Formate	30'
0.1-0.7%	<b>Munitan MAK</b>	30'
0.5-0.7%	Sodium Bicarbonate	30'

#### Storage Conditions

The product should be well sealed and must be stored in covered area between 5-25°C. Freezing and direct sun light must be avoided.

#### Applications & Recommendations

**Munitan MAK** has very good neutralizing capacity. It has excellent lightfastness.

**Munitan MAK** can be used single in neutralization process. It is used as neutralizing tanning and retanning materials for aniline, Nubuck, suede and other types of leather where full colors, brilliance, levelness, light fastness and heat resistance are desired.

Its better application occurs when used between Sodium formate and bicarbonate about 0.1-0.7% for 30-45'.

**Note:** Due to its buffery effect, when used in neutralization, the pH does not exceed 7-7.5 even by adding powerful alkalies
