

Munitan MLF

Retanning

Syantn & Auxiliary

Description

Munitan MLF is a phenolic retanning agent which can be used for any type of leather retanning. It is compatible with synthetic and vegetable tannins, fatliquors, anionic dyes and other chemicals. It has excellent filling and mellowing and some bleaching effect.

Munitan MLF is a light fast retanning with good dispersing effect on anionic products.

Specification

Ionity	Anionic
pH (1:10 Solution)	7 - 8
Safety	According to the best of our experience, it does not have any harmful effect on health
Packing	25 KG PE Bags
Shelf life	1 year

Applications & Recommendations

Munitan MLF is particularly suitable for pale, pastel coloured and for white leathers but when used in dyed leathers it should be used in proper stage for giving a very good filling and mellowing effect.

Munitan MLF imparts the leather good light fastness. **Munitan MLF** is used for all types of leathers to obtain a very full result

single or in combination with other Munitans. It's outstanding dispersing and softening effect, helps the fatliquors to be reduced.

Percentage of use depends on the type of leather and varies from 3 to 10% (based on the shaved weight). Also, it can be used together with Mimosa extract for better absorption.

Storage Conditions

The product should be well sealed and must be stored in covered area between 5-25°C. Freezing and direct sun light must be avoided.
