

## Munitan MP2

### Retanning

### Synton & Auxiliary

#### Description

##### Description

**Munitan MP2** is a weakly acid, naphthalene based synthetic retanning agent which is used in any type of leather. It has a great filling effect on loose parts of the leather like bellies and shanks.

#### Specification

<b>Appearance</b>	Light Brown Powder
<b>Nature</b>	Naphthalene Based Synthetic
<b>Ionicity</b>	Anionic
<b>pH (1:10 Solution)</b>	3 ± 0.5
<b>Safety</b>	According to the best of our experience, it does not have any harmful effect on health
<b>Packing</b>	25 KG PE Bags
<b>Shelf life</b>	1 year

#### Applications & Recommendations

**Munitan MP2** imparts the leather a very good filling.

If **Munitan MP2** is used with Munitan MR7 or vegetable tanning agents, it will make a bleaching effect on dye.

It is recommended that this product is used alone or in combination with other chemicals for white crusts.

**Munitan MP2** can be used in neutralization with other neutralizing agents like sodium formate and bicarbonate to decrease the superficial deposition of retanning materials. The

consumption rate varies with the type of leather and is about 1-7% (based on the shaved weight) after neutralization and dyeing.

**Munitan MP2** also makes great dispersing impact on dyestuffs, amino resins and replacement syntans.

##### Neutralization:

1 - 3%	Munitan MP2 30'
X%	Sodium bicarbonate Water 35°C
X%	Dye 45 - 60'
2 - 3%	Munitan ME-54 30'
1 - 7%	Munitan MR7
1 - 3%	Munitan MP2 30'
+ Other retanning agents	

#### Storage Conditions

The product should be well sealed and must be stored in covered area between 5-25°C. Freezing and direct sun light must be avoided.
