

## Munitan MPAK

### Tanning

#### Anionic Tanning & Retanning Agent

#### Description

**Munitan MPAK** is a light fast, anionic retanning material in powder form with a pronounced neutralizing and buffering effect and excellent dyeing properties.

#### Specification

<b>Appearance</b>	White powder
<b>Nature</b>	Organic and inorganic compounds
<b>pH (1:10 solution)</b>	3 - 4
<b>Ionity</b>	Anionic
<b>Concentration, %</b>	Approx. 98
<b>Safety</b>	According to the best of our experience, it does not have any harmful effect on health
<b>Packing</b>	25 KG PE Bags
<b>Shelf life</b>	1 year

**Note:** Due to its buffery effect, when used in neutralization, the PH doesn't exceed 7-7.5 even by adding powerful alkalies like caustic soda.

#### Storage Conditions

The product should be well sealed and must be stored in covered area between 5-25°C. Freezing and direct sun light must be avoided.

#### Applications & Recommendations

**Munitan MPAK** has very good neutralizing capacity. It has excellent light fastness.

**Munitan MPAK** can be used single in neutralization process. It is used as neutralizing tanning and retanning materials for aniline, Nubuck, suede and other types of leather where full colors, brilliance, levelness, light fastness and heat resistance are desired. Its better application occurs when used between Sodium formate and bicarbonate about 0.1-0.7% for 30-45'.
