

Munitan MRN

Retanning

Synton & Auxiliary

Description

Munitan MRN can be used in tanning and retanning of white leathers together with chrome powder. If used in mineral tanning, it accelerates penetration and improves dispersion of tanning agents. Also, it imparts a tighter and denser grain to leathers tanned or retanned with this product and in suede leathers gives finer nap.

Specification

| | |
|---------------------------------------|--|
| Appearance | Faintly green powder |
| Nature | Aluminum-chrome tanning agent |
| Cr₂O₃, % | 3.5 |
| Al, % | 14 - 15 |
| Ionity | Cationic |
| pH (1:10 Solution) | 2.2 – 2.5 |
| Safety | According to the best of our experience, it does not have any harmful effect on health |
| Packing | 25 KG PE Bags |
| Shelf life | 1 year |

Applications & Recommendations

Munitan MRN is soluble even in cold water and its solutions are compatible with acids, salts and chrome tanning agents. If used alone for tanning, it gives a white leather and in tanning wool skins, a comparatively pale leather is achieved without greening the wool. The

consumption rate is about 2-3% in tanning (together with 5-6% chrome powder) and 2-4% in retanning (before neutralization).

Storage Conditions

The product should be well sealed and must be stored in covered area between 5-25°C. Freezing and direct sun light must be avoided.
