Applications & Recommendations

Muniwax MON improves the fullness, glazing and repolishing properties. If **Muniwax MON** is used with emulsion lacquer, it makes finish with less glossy surface and smooth touch.

Muniwax MON is used in any finish where the excellent touch and feel required.

If it is used in base coats, the filling and will be improved, the absorption will be leveled and the amount of grain faults will be reduced. Due to the nature, it covers a wide range of temperature in polishing, plating and ironing.

Muniwax MON is compatible with other protein finishes to achieve a pleasant surface touch.

Muniwax MON is suitable for upper, softy, nappa, glaze, garment and vegetable leathers.

Caution

Muniwax MON is cold sensitive and in storage and transportation must be kept away from freezing.

Storage Conditions

The product should be well sealed and must be stored in covered area between 5-25°C. Freezing and direct sun light must be avoided.
