

Munizyme 20

Leather Chemicals

Enzymatic Soaking Auxiliary

Description

Munizyme 20 is an enzymatic soaking auxiliary for green and salted raw stock.

Specification

Appearance	White Powder
Nature	Pancreatic Mixture
Activity, Ivu	1500
pH (1:10 solution)	11
Density, g/cm³	0.7
Safety	According to the best of our experience, it does not have any harmful effect on health
Packing	25 KG PE Bags
Shelf life	1 year

Storage Conditions

The product should be well sealed and must be stored in covered area between 5-25°C. Freezing and direct sun light must be avoided.

Applications & Recommendations

Munizyme 20 is added undissolved to the soaking process. Caustic soda or soda ash can be used to adjust the pH value. The chosen substance should be dosed in such way that the initial pH value of the liquor is 10.0 - 10.5 and the final value pH 9.0 - 9.5.
