

Munizyme 75

Beamhouse

Bating Agent

Description

Munizyme 75 is a protease alkaline bating agent which contains ammonium salts and buffers.

Munizyme 75 is suitable for all kinds of pelts. By applying **Munizyme 75** the grain clarity and smoothness will be improved and all excess proteins will be dissolved and removed from the hides and skins.

Specification

Appearance	Cream powder	
Nature	Protease	alkaline enzyme
Solid Content, %	100	
Activity	1500 Iuv	
pH (1:10 solution)	Neutral	
Safety	According to the best of our experience, it does not have any harmful effect on health	
Packing	25 KG PE Bags	
Shelf life	1 year	

Applications & Recommendations

Munizyme 75 is very effective at temperature of 33 - 37°C and pH Value 8.3. Used quantity is different based on the type of pelt and degree of required effect.

The recommendation for use is:

0.5-1.0% (Pelt wt.) Cow
0.4-0.6% (Pelt wt.) Sheep

0.4-1.3% (Pelt wt.) Goat
1.5-2.0% (Pelt wt.) Buffalo

After liming and fleshing
300% Water 25°C 15 min drain
300% Water 30°C 15 min drain
100% Water 37°C
0.1% Rockol 642
X% **Munizyme 75** 30-60 min drain

Check bating process & Drain
300% Water 37°C 15 min drain
300% Water 25°C 15 min drain

Storage Conditions

The product should be well sealed and must be stored in covered area between 5-25°C. Freezing and direct sun light must be avoided.
